Personal Summary

I'm a Computer Science Engineering student who got really interested in cybersecurity and understanding how things work behind the scenes. I've learned through ethical hacking, CTFs, OSINT, cryptography, Linux, and different security projects. I also started a cybersecurity community at FISAT, where I currently lead the club and work with other students interested in the field.

I've competed in CTFs, led teams, and had the chance to finish first in a cybersecurity competition. Most of what I've learned has come from actually trying things, breaking them, figuring out why they broke, and understanding how to fix them.

I'm still exploring where I want to go deeper in cybersecurity, but I'm looking for opportunities to work on real problems, learn from experienced people, and build things that actually matter.

Skills

- Network Security
- Web Application Security
- Security incident monitoring
- Risk assessment methodologies
- Nmap
- Burp Suite
- Maltego
- Wireshark
- Linux
- C Programming
- Java (Core Concepts)
- Data Structures
- DBMS (Fundamentals)
- Machine learning
- Data analysis tools
- CTF Problem Solving
- Problem solving
- Strategic thinking
- Network security

Work Experience

FISAT | Ernakulam, Kerala

Founder & Lead

08/2026 - Current

- Founded and led ACM CyberCom at FISAT, creating a vibrant student-driven cybersecurity community that emphasized hands-on learning and collaboration.
- Defined technical direction for community, guiding focus on ethical hacking, OSINT, cryptography, network security, and security research to enhance members' skills.
- Developed initiatives to promote practical cybersecurity learning and collaborative projects, fostering deeper engagement beyond classroom settings.

Federal Institute Of Science And Technology | Ernakulam, Kerala

Documentation Team Volunteer - ISACA Student Group

09/2025 - 05/2028

- Prepared and maintained documentation for workshops, seminars, and technical events.
- Recorded meeting minutes and organized event reports to provide clear summaries for future reference.
- Assisted in creating event materials and coordinated with team members to ensure alignment and clarity in presentations.
- Ensured accurate and timely documentation of chapter activities to support effective communication and planning.

Federal Institute Of Science And Technology | Ernakulam, Kerala
Placement Cell Volunteer
07/2026 - 07/2027

- Collaborated with peers to facilitate educational workshops and events.
- Provided guidance and support to fellow volunteers during their shifts.
- Collaborated with other volunteers to create a positive work environment.
- Provided assistance to community members during events.
- Assisted faculty with laboratory setup and equipment organization.

Innovagic Consultancy and IT Services Co. W.L.L | Manama, Kingdom of Bahrain
Cybersecurity Intern
06/2025 - 07/2025

- Identified system risks, strengthened network safety, and supported secure IT operations to enhance overall cybersecurity posture.
- Developed problem-solving skills by analyzing system vulnerabilities and implementing effective solutions, enhancing network security.
- Participated in real-world cybersecurity workflows, conducting security assessments and applying network security practices to address vulnerabilities.

Education

Federal Institute of Science And Technology | Ernakulam
B.Tech in Computer Science Engineering
08/2026

- Building strong foundations in programming, data structures, and computer networks
- Developing interest in cybersecurity and hands-on security practices

St. Antony's Public School Anakkal | Anakkal
Higher Secondary Education
01/2024

The Indian School Bahrain | Bahrain
Secondary Education
01/2022

Projects

Network Packet Analyzer

- Built a low-level network packet sniffer using **Python and Scapy**.
- Captures and analyzes network traffic at the packet level.
- Helps understand protocols and how data moves across networks.

Password Strength Checker

- Developed a tool to **evaluate password strength**.
- Checks passwords for common weaknesses and poor security practices.
- Provides a simple way to assess password security.

SentryXAI

- Developed an **AI-powered security intelligence platform**.
- Explores the use of AI for analyzing security information and identifying potential threats.
- Focused on turning security data into useful, actionable insights.

SighShield

- Built a **real-time desktop privacy protection tool**.
- Detects sensitive information such as **API keys, passwords, and PII** on the screen.
- Uses OCR and computer vision to identify sensitive content and automatically mask it.
- Designed to reduce accidental data exposure during screen sharing or recording.

Volunteering And Leadership

- Founder & Lead, CyberCom - FISAT, Ernakulam, Kerala, 08/2026, Present, Founded a student-led cybersecurity club at FISAT to bring together students interested in cybersecurity and hands-on learning., Built a community where students

could learn, collaborate, explore security tools, and take part in CTF competitions., Helped encourage practical learning beyond the classroom and worked with students to develop their cybersecurity skills.

- Documentation Team Volunteer - ISACA Student Group, Federal Institute Of Science And Technology, Ernakulam, Kerala, 09/2025, 05/2028, Prepared and maintained documentation for workshops, seminars, and technical events., Recorded meeting minutes and organized event reports., Assisted in creating event materials and coordinating with team members., Helped ensure accurate and timely documentation of chapter activities.
- Placement Cell Volunteer, Federal Institute Of Science And Technology, Ernakulam, Kerala, 07/2026, 07/2027

Awards And Scholarships

- InCTF - National CTF Finalist, 08/2026, InCTF By Amrita Vishwa Vidyapeetham
- 1st Place - Cybersecurity CTF Competition, 06/2025, Government Engineering College, Palakkad
